WARRANTY INFORMATION

#1 RATED BRAND
IN CORDLESS OUTDOOR POWER

#1 RATED BRAND*

EGO is the #1 rated brand in cordless outdoor power according to industry experts and purchasers based on power, performance, durability, and value.

POWER AND PERFORMANCE OF GAS

All EGO tools deliver or exceed the power and performance of gas—without the noise, fuss, or fumes—guaranteeing maximum power, longer runtimes, and industry-leading recharge times.

INDUSTRY'S MOST ADVANCED TECHNOLOGY

Our patented ARC Lithium™ technology is the most advanced in the outdoor power equipment industry with its shock-resistant design, intelligent power management, innovative ARC-shaped design, and keep-cool cell technology.

INNOVATION

No matter which EGO tool you use, you can expect groundbreaking innovation that solves for pain points, such as the world's first LINE IQ™ technology, world's first platform-compatible zero-turn riding mower, and world's first auto tensioning technology.

*Best rated suite of products 2020–2024, plus more top ratings for more cordless outdoor power products than any other major brand from 2014-2024, as tested and rated by a leading non-profit rating organization.

POWER+ BATTERIES & CHARGERS

INDUSTRY'S MOST ADVANCED TECHNOLOGY

ARC LITHIUM 56V

BETTER PERFORMANCE IS BUILT IN

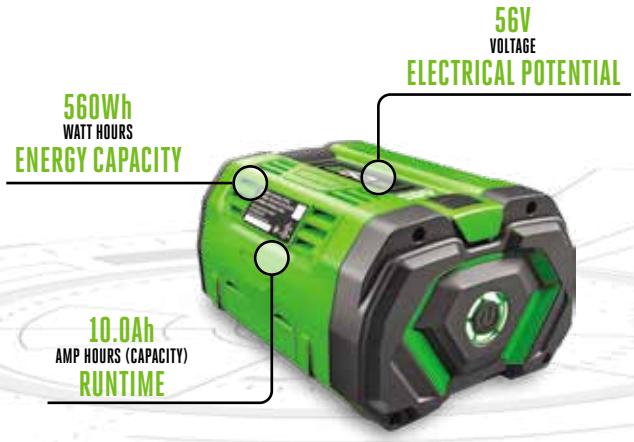
No matter which EGO battery you choose, you'll get:

- Shock-resistant that design protects from drops and elements
- Our patented power management system to maximize power and runtime
- Revolutionary phase-change material that keeps cells running cool
- An integrated fuel gauge that shows you how much power is left
- A 3-year limited warranty; 5-year limited warranty for BA5600T, BA6720T with registration, see egopowerplus.com/warranty-policy for details

FROM EMPTY TO FULLY CHARGED, IN AS LITTLE AS 30 MIN

With a range of battery sizes available from 2.5Ah to 12Ah, you can choose the power you need. When it's time to recharge, EGO chargers are among the fastest on the market. Their intelligent battery control system constantly monitors each cell's charge and temperature to deliver the quickest, most efficient charge. Plus, the fan-cooling system allows the battery to start charging sooner and finish faster.

As a result, the time it takes to recharge the battery is often less than the runtime you get from a full charge. So you'll always have a battery ready for all-day power and runtime.



VOLTAGE ≠ PERFORMANCE

Performance of a battery is determined by a combination of ENERGY(Wh) and POWER(W)

CAPACITY (Ah) x VOLTAGE (V) = ENERGY (Wh)

VOLTAGE (V) x CURRENT (A) = POWER (W)

SELECT CUT™ MULTI-BLADE SYSTEM

The Select Cut™ Multi-Blade Cutting System is equipped with three interchangeable lower blades: the Mulching Blade, High Lift Bagging Blade, and Extended Runtime Blade. The Mulching Blade comes installed on the lawn mower and is ideal for weekly mulching, giving you the mulching quality expected from a high-end gas lawn mower. The High Lift Bagging Blade provides extra suction ideal for bagging, leaving your yard free of clippings. The Extended Runtime Blade provides an optimal balance of cut quality and runtime for all around performance. All three blades can be used interchangeably based on your desired cut. The Upper Blade is used in combination with the lower blade chosen to slice the grass into fine fragments, greatly enhancing cutting performance with all grass types.

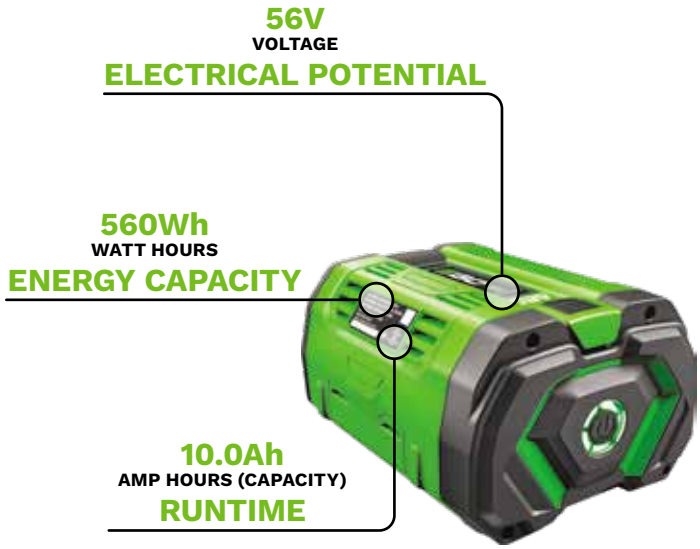
ALL VOLTS ARE NOT CREATED EQUAL



VOLTAGE ≠ PERFORMANCE

Performance of a battery is determined by a combination of **ENERGY(Wh)** and **POWER(W)**

CAPACITY (Ah)	x	VOLTAGE (V)	=	ENERGY (Wh)
VOLTAGE (V)	x	CURRENT (A)	=	POWER (W)
